Replant criteria: planting 4 for the 1 cut down should be only 1 measurement. Port of Sea needs to consider ^① equating area of foliage to surface area of photosynthesis. ^② preserving areas or number of evergreen trees, so to preserve the name **EVERGREEN STATE!**

Please consider replanting those trees that were
fell to make way for the 3rd runway, not only the
ones (2747) for the corridor "safety".

Please re-think a better thinning method to make it
work. Clear cutting is never good.

Ask the airlines to hire more astute pilots.
