The Puget Sound Skills Center is building a new health science career building right next to 509. How safe is it? The height seems higher than the trees. I also wonder about the buildings along International Boulevard. They are higher than the trees. In both cases, the trees are lower than the buildings, yet trees & buildings are the same distance from the runways.

Has the Port considered planting plants on the retaining wall grassy area? At times we see a lot of ratch broom - not good for allergies. There's also a lot of ratch broom at the north area (518).
