Dear Commissioners,

The Land Stewardship Plan's greenwashing cannot hide the catastrophic environmental and health impacts inherent in a plan to pave over cooling, air-purifying forests that protect polluted frontline communities. I support the Defenders of Highline Forest and ask the Port to withdraw its plans to industrially develop the forests it owns and stop acquiring forested land for development ([tinyurl.com/defendHighlinePark](https://tinyurl.com/defendHighlinePark)).

Riverton Heights (27 acres): Clearcutting this forest for two huge cargo warehouses is an affront to this community which recently lost 100 acres of forest for a jail, parking lots and cargo space.

North SeaTac Park (110 acres): Plans to develop this forest are moving ahead, including the removal of 17-acre Tub Lake Bog buffer forest. This forest protects one of the last peat bogs in King County and an important aquifer recharge resource for the region. The Port has a history of destroying wetlands and this does not appear to have changed.

KC Public Health confirmed people in airport communities live shorter, sicker lives. Negative health impacts stretch for ten miles in a direct correlation with proximity to SeaTac. The report recommends expanding trees near SeaTac.

This plan must be revised to protect these forests and those near them.

This forest protects one of the last peat bogs in King County and an important aquifer recharge resource for the region. The Port has a history of destroying wetlands and this does not appear to have changed.

This is not just about the trees. King County Public Health has confirmed that people in airport communities live shorter, sicker lives. Negative health impacts stretch for ten miles in a direct correlation with proximity to SeaTac. To offset this, the report recommends planting, protecting, and preserving trees near SeaTac.

This plan will be a detriment to the public health of residents in the area and will drastically reduce forest habitat. It must be revised to protect these forests and those near them.

Sincerely,  
Ellen Arnstein

This plan must be revised to protect these forests and those near them.

I would like to add that I deeply care about the children living in the communities surrounding the park. They deserve to live in healthy spaces, with full access to their parks and as many trees surrounding them as possible. We have to stop choosing profits over protecting our children.

Thank you for your time,  
Sadie Ciccia-Strain

## [EXTERNAL] Comment on Land Stewardship Plan

Karen Crum <hepzibahh2002@yahoo.com>

Tue 3/12/2024 4:39 PM

To: Calkins, Ryan <Calkins.R@portseattle.org>; Cho, Sam <Cho.S@portseattle.org>; Felleman, Fred <Felleman.F@portseattle.org>; Hasegawa, Toshiko <Hasegawa.T@portseattle.org>; Mohamed, Hamdi <Mohamed.H@portseattle.org>; Commission-Public-Records <commission-public-records@portseattle.org>

Cc: info@treeactionseattle.com <info@treeactionseattle.com>; info@defendersofhighlineforest.org <info@defendersofhighlineforest.org>

WARNING: External email. Links or attachments may be unsafe.

Dear Commissioners,

I oppose the Land Stewardship Plan which will destroy and pave over irreplaceable forests and established natural ecosystems that protect already-polluted frontline communities.

I support the Defenders of Highline Forest and ask the Port to withdraw its plans to industrially “develop” (=destroy) existing forests and to stop acquiring forested land for development ([tinyurl.com/defendHighlinePark](https://tinyurl.com/defendHighlinePark)).

Riverton Heights (27 acres): Clearcutting this forest for two huge cargo warehouses is unacceptable. To do this in a community which recently lost 100 acres of forest for a jail, parking lots and cargo space is unacceptable.

North SeaTac Park (110 acres): It is unacceptable to “develop” (=destroy) this forest and remove the 17-acre Tub Lake Bog buffer forest. This forest protects one of the last peat bogs in King County - irreplaceable as the last, and irreplaceable as itself, irreplaceable as an existing carbon sequestration resource - and as an important aquifer recharge resource for the region.

The Port’s history of destroying wetlands is unsustainable, indefensible, and cannot continue.

KC Public Health confirmed that people in airport communities live shorter, less healthy lives. Negative health impacts stretch for ten miles in a direct correlation with proximity to SeaTac. The current plan will only exacerbate this. The report recommends expanding trees near SeaTac, not destroying more.

I respectfully demand this plan be revised to protect these forests as the life-sustaining ecosystems they are, and to honestly account for their value to all the lives that depend on our remaining natural spaces. No more forest destruction.

Dear Commissioners,

It is hard for me to understand, especially with everything that is known about climate change, that you wouldn't be doing everything in your power to preserve the city and county's quickly dwindling green space. How is this land stewardship? We are lucky to live somewhere so green and healthy and it is important to preserve it. Growth can happen while maintaining green space. Please do not approve this. Please stop destroying green space. It is deeply short sighted and frankly cruel.

The Land Stewardship Plan's greenwashing cannot hide the catastrophic environmental and health impacts inherent in a plan to pave over cooling, air-purifying forests that protect polluted frontline communities. I support the Defenders of Highline Forest and ask the Port to withdraw its plans to industrially develop the forests it owns and stop acquiring forested land for development ([tinyurl.com/defendHighlinePark](https://tinyurl.com/defendHighlinePark)).

Riverton Heights (27 acres): Clearcutting this forest for two huge cargo warehouses is an affront to this community which recently lost 100 acres of forest for a jail, parking lots and cargo space.

North SeaTac Park (110 acres): Plans to develop this forest are moving ahead, including the removal of 17-acre Tub Lake Bog buffer forest. This forest protects one of the last peat bogs in King County and an important aquifer recharge resource for the region. The Port has a history of destroying wetlands and this does not appear to have changed.

KC Public Health confirmed people in airport communities live shorter, sicker lives. Negative health impacts stretch for ten miles in a direct correlation with proximity to SeaTac. The report recommends expanding trees near SeaTac.

This plan must be revised to protect these forests and those near them.

Sincerely,  
Jill Doran  
Seattle, WA

Dear Commissioners,

The Land Stewardship Plan's greenwashing cannot hide the catastrophic environmental and health impacts inherent in a plan to pave over cooling, air-purifying forests that protect polluted frontline communities. I support the Defenders of Highline Forest and ask the Port to withdraw its plans to industrially develop the forests it owns and stop acquiring forested land for development ([tinyurl.com/defendHighlinePark](https://tinyurl.com/defendHighlinePark)).

Riverton Heights (27 acres): Clearcutting this forest for two huge cargo warehouses is an affront to this community which recently lost 100 acres of forest for a jail, parking lots and cargo space.

North SeaTac Park (110 acres): Plans to develop this forest are moving ahead, including the removal of 17-acre Tub Lake Bog buffer forest. This forest protects one of the last peat bogs in King County and an important aquifer recharge resource for the region. The Port has a history of destroying wetlands and this does not appear to have changed.

KC Public Health confirmed people in airport communities live shorter, sicker lives. Negative health impacts stretch for ten miles in a direct correlation with proximity to SeaTac. The report recommends expanding trees near SeaTac.

This plan must be revised to protect these forests and those near them.

Commissioners, Fred and Ryan in particular,

I'm rather concerned and disappointed the Port is still pursuing this plan to destroy so much forest in an already impacted area. I typically look to the port as a leader in sustainability and environmental stewardship. Is there anything you are doing to course correct here?

Thanks,

Andy

Dear Commissioners,

The Land Stewardship Plan's greenwashing cannot hide the catastrophic environmental and health impacts inherent in a plan to pave over cooling, air-purifying forests that protect polluted frontline communities. I support the Defenders of Highline Forest and ask the Port to withdraw its plans to industrially develop the forests it owns and stop acquiring forested land for development ([tinyurl.com/defendHighlinePark](https://tinyurl.com/defendHighlinePark)).

Riverton Heights (27 acres): Clearcutting this forest for two huge cargo warehouses is an affront to this community which recently lost 100 acres of forest for a jail, parking lots and cargo space.

North SeaTac Park (110 acres): Plans to develop this forest are moving ahead, including the removal of 17-acre Tub Lake Bog buffer forest. This forest protects one of the last peat bogs in King County and an important aquifer recharge resource for the region. The Port has a history of destroying wetlands and this does not appear to have changed.

KC Public Health confirmed people in airport communities live shorter, sicker lives. Negative health impacts stretch for ten miles in a direct correlation with proximity to SeaTac. The report recommends expanding trees near SeaTac.

This plan must be revised to protect these forests and those near them.

WARNING: External email. Links or attachments may be unsafe.

Dear Commissioners,

I live by SeaTac park. The summers grow hotter and become unbearable in this area. Without the trees we have been left with, it will become unlivable.

I vote, own property and pay property taxes here.

And I really don't have time to join a protest and cuff myself to a tree, but I will.

The Land Stewardship Plan's greenwashing cannot hide the catastrophic environmental and health impacts inherent in a plan to pave over cooling, air-purifying forests that protect polluted frontline communities. I support the Defenders of Highline Forest and ask the Port to withdraw its plans to industrially develop the forests it owns and stop acquiring forested land for development ([tinyurl.com/defendHighlinePark](https://tinyurl.com/defendHighlinePark)).

-PLEASE DO NOT DO THIS-

KC Public Health confirmed people in airport communities live shorter, sicker lives. Negative health impacts stretch for ten miles in a direct correlation with proximity to SeaTac. The report recommends expanding trees near SeaTac.

This plan must be revised to protect these forests and those near them.

Please help the people in the communities that live here, like me.
