Fourth Quarter Report 2008

This page intentionally left blank

#### Port of Seattle Capital Improvement Project Report Fourth Quarter 2008

#### Introduction

The Port of Seattle is a municipal corporation chartered by the State of Washington with the mission to be an economic engine for the Puget Sound region and the State. A primary activity of the Port is to create capital assets that allow the efficient flow of goods and people into and out of the area. The intent of this report is to provide the public with high level information on the status of the Port's capital projects.

#### Background

During 2008 the Port plans to invest over \$700 million to expand and upgrade the infrastructure that supports marine and aviation commerce. Funding for the Port comes mainly from the users of its facilities, including shipping companies, airlines, rental car companies, concessionaires and public parking. About 11 percent of the Port's capital budget comes from a tax levy on property in King County. The Tax levy funds are used selectively for investments in maritime transportation facilities and environmental and noise mitigation projects.

The Port is dedicated to sound stewardship of the resources its customers and the public entrust to it. This means accomplishing its mission efficiently, effectively and economically, and making its actions transparent to its business partners and the general public.

#### About the Report

The report will provide general information on the project description, status, significant developments, schedule, budget, change orders, risks, and budget transfers. The report may include graphics that report project costs compared to authorization, construction costs (including change orders) compared to the construction contract, location maps, and photographs. The Port implements a number of different types of projects and not all information may be relevant to a specific project; as such the reports may vary in detail and content. Project types may range from construction, to noise mitigation, to technology.

The project description includes the project title, project number [Capital Improvement Project (CIP)], project phase, and estimated completion date (beneficial occupancy). This section also includes a "Status Snapshot" illustrating at a glance if the project is on schedule, within budget, the total number of change orders to date, and the total value of executed change orders.

- **Significant Developments** covers items such as accomplishments, significant events or milestones, contract advertisements and awards, upcoming activities, and environmental issues.
- **Schedule** includes information on the project schedule, the total schedule variance and variance since the last report, contract extensions, and information on critical dates.
- **Budget** addresses the total project budget and includes things like overall budget status, recent Commission authorizations, forecasted overruns or savings, and scope changes.
- **Change Orders** provides a description of change orders for the reporting period and information on any change orders over \$200,000 or 10% of the contract value.
- **Risks** describes any significant risk of delay, any significant risk to cost, or any significant change order.
- **Budget Transfers** reports any transfers of more than \$200,000 between authorized projects during the reporting period.

Additional information may include graphics indicating budget, construction costs, location, and photographs.

These reports are intended to meet the reporting requirements of Port of Seattle Commission Resolution 3605 and the Commission motion on January 8, 2008 regarding "Reports on Major Capital Projects."

#### **Additional Information**

For additional information, please visit the <u>Contact Us</u> page and select the Audit/Accountability button. Use the form to ask a question, make a comment or request a copy of the State Audit Reports Response and Action Plan.

FOURTH QUARTER REPORT, 2008

# 3<sup>rd</sup> Runway Program

Project: C000683, C001138, C001175, C001331, C001751, C001760, C100172 Budget: \$979,483,541 Phase: Construction Start: 05/27/1997 Completion: 12/31/2011 The 3rd Runway Program will construct a new 8,500 foot long dependent runway, connecting taxiways, and related infrastructure. When complete the 3rd Runway will significantly reduce weatherrelated delays.

### **Status Snapshot**

On Schedule On Budget 52 Change Orders Total Change Orders Amount: \$2,553,629.37

# **Significant Developments**

The current construction contract for the paving of the runway and taxiways and construction of related infrastructure, expansion of Runway 16C Safety Area and construction of a new Airfield Lighting Facility is 100% complete. The runway was opened to the first commercial flight on November 20th, 2008. Future contracts will construct permanent stormwater facilities, complete remaining mitigation projects, demolish temporary facilities used in the construction of the runway and accomplish other related activities.

# **Schedule**

The current construction contract was awarded in February 2007 and will begin contract closeout after punch list items are completed.

# **Budget**

Reduced budget by \$63,000,000 to the current budget of \$979,483,541. To date, \$634,000,000 of construction has been completed on the overall program.

# **Change Order**

Twelve change orders for a total of \$339,185 have been executed during this period. None involved extension of the contract time.

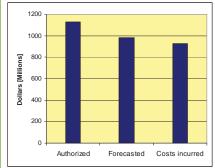

# **Risks**

No significant risks are identified at this time.

# **Central Terminal Expansion**

Project: C001802 Budget: \$145,714,675 Phase: Close Out Start: 11/14/2000 Completion: 04/29/2005 This project rebuilt and expanded the central portion of the Main Terminal to create a focal point for the Airport, with concessions, a security checkpoint, and a gathering place for travelers.

# Significant Developments

The facilities have been in use since April 2005 and the new concessions are a financial success. Contract claims were submitted to a Disputes Resolution Board (DRB). The final claim was settled and final payment was made in October 2008. This will be the last quarterly report issued for this project.

# Schedule

Construction work is complete.

# **Budget**

The final payment to the contractor has been made. The project forecast is within the approved budget and authorization.

# **Change Order**

The final settlement change order was issued.

# **Risks**

None identified at this time.

# **Budget Transfers**

None this quarter.

# **Rental Car Facility**

Project: C100266, C100444, C101610, C102167, C800032, C800163 Budget: \$412,320,000 Phase: Construction Start: 02/24/1998 Completion: Unknown The program will construct a consolidated rental car facility (RCF) for all rental car companies at the airport, a bus maintenance facility (BMF), and off-site roadway mitigation, plus purchase a fleet of buses.

### **Status Snapshot**

Delayed Schedule On Budget 23 Change Orders Total Change Orders Amount: \$3,828,131

# Budget/Costs Incurred

## **Significant Developments**

Commission suspended RCF Construction on 12/15/08 due to lack of financing. Excavation is mostly done and the retaining wall and the building footings/columns are in various stages of completion. The stormwater vault is 90% complete, two tower cranes are erected and many underground utilities are partially complete. A process is underway to protect the work-in-place and leave the site in a stable condition for the suspension. The 90% design is underway for both the BMF and the Off-Site Roads Improvements (ORI). The ORI work is being coordinated with WSDOT construction planned for the same area.

# Schedule

RCF construction is suspended for up to one year. Program completion is unknown. BMF design remains on schedule. ORI coordination and utility investigations delayed the ORI design by two months.

# **Budget**

Customer Finance Charge (CFC) funding receipts are lower than planned due to the economy. With suspension, current budget is no longer obtainable. Additional non-CFC budget required for Compressed Natural Gas (CNG) station at BMF. ORI remains on budget.

# **Change Order**

Four change orders in the amount of (\$15,000) were executed to the 3 contracts this quarter.

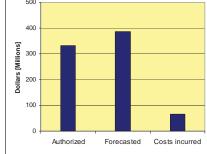

# **Risks**

Financial market ability to bond. Claims due to suspension could get significant the longer the suspension is in place. Decision to incorporate a CNG station within the BMF will increase costs and delay schedule. ORI design delay loses 2009 construction season impacting RCF opening until fall 2011. Length of suspension may postpone this date.

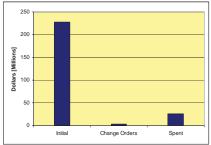

# Budget Transfers

None.

AIRPORT

### **Construction Costs**

#### Photo

#### FOURTH QUARTER REPORT, 2008

# **Communication Systems Implementation**

Project: C100285 Budget: \$68,178,575 Phase: Implementation Start: 12/14/1999 Completion: (See C102163) The program to modernize existing systems and introduce state-of-theart technology to the Airport was accomplished through a suite of interrelated communications projects.

# **Significant Developments**

The program has constructed a fiber optic communications backbone, flight information management system, common use terminal equipment, an 800 MHz radio system and building management systems. The current work remaining on this program is the installation of the baggage source messaging system to the airline carriers for each baggage system. The last remaining system to be brought online is the C-1 Baggage System.

# Schedule

The finalization of this project is dependent on the completion of the C-1 Baggage System, and is on schedule to meet all deadlines required for the commissioning of that system. The completion of the C-1 Baggage System is scheduled for first quarter of 2009.

# **Budget**

The project is anticipating a savings of approximately \$795,000.

# **Change Order**

None.

### **Risks** None identified at this time.

# **Budget Transfers**

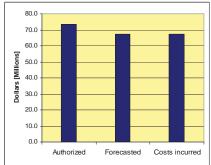

None this quarter.

# AIRPORT

Delayed Schedule 1Q 08 Under Budget No Change Orders Total Change Orders Amount: N/A

### **Budget/Costs Incurred**

#### 8 — Port of Seattle 4Q 2008 Report

# **Maintenance Facility Replacement**

Project: C100403 Budget: \$643,244 Phase: Close Out Start: 9/01/2000 Completion: 12/31/2008 Build an industrial building for shops, storage, offices to support field operations, and a fueling station for emergency and support vehicles.

# **Significant Developments**

Project is being closed because portions of the planned building were integrated into the Rental Car Facility Bus Maintainance Facility and the Consolidated Warehouse projects. If a replacement maintenance facility is needed in the future a new project will be initiated. This will be the last quarterly report issued for this project.

# Schedule

Project is in closeout.

# **Budget**

The project is anticipating a savings of approximately \$100,000 (of budget).

# **Change Order**

None.

**Risks** None identified at this time.

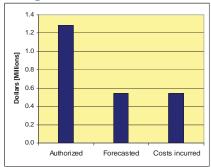

# **Budget Transfers**

None this quarter.

### Status Snapshot

On Schedule Under Budget No Change Orders Total Change Orders Amount: N/A

### **Budget/Costs Incurred**

Construction Costs Not Applicable

# Industrial Waste System Upgrade

Project: C100451 Budget: \$12,012,185 Phase: Design Start: 09/12/2000 Completion: 03/12/2010 The Industrial Wastewater System (IWS) collects and treats storm water that could be contaminated by fuel, solvents or deicing chemicals. The project upgrades the IWS to meet or exceed all environmental permit standards.

# Significant Developments

Construction of the primary IWS Upgrades is complete. The remaining project to upgrade the backflow prevention is in design. The 65% design review of the backflow prevention contract identified additional design work to move an electrical ductbank and to provide power and controls to a motorized valve. Electrical design services must be arranged by amending the design contract or some other method. The current design contract has amendments exceeding 50% of the initial amount.

# Schedule

No change from last quarter.

# **Budget**

The project forecast is within the approved budget and authorization.

# **Change Order**

None this quarter.

# **Risks**

Arranging for electrical design could delay the project. If it is not completed by October 1, 2009, there is a risk of hydraulic overflow of high biological oxygen demand (BOD) into lagoon #3, which would be very expensive to treat.

# **Budget Transfers**

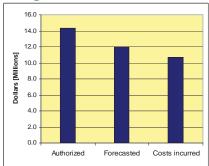

None this quarter.

# AIRPORT

#### Status Snapshot Prior Report

### **Budget/Costs Incurred**

### **Construction Costs**

No active contracts at this time.

# **Electrical System Infrastructure**

Project: C100525 Budget: \$80,535,362 Phase: Close Out Start: 12/12/2004 Completion: 01/01/2008 Replace electrical feeders to the airport. Expand north and south substations and emergency power generation capabilities. Add new duct bank and feeders to airport electrical grid.

# **Significant Developments**

The overall program is complete. Substantial completion was signed in April 2008 for the final project - Feeders 109/209 & 111/211 Installation. This will be the last quarterly report issued for this project.

# Schedule

Construction is complete. General contract is closing out.

# **Budget**

The project is anticipating a savings of approximately \$275,000.

# **Change Order**

Time extensions for the Feeder 109/209 project are in negotiation.

# **Risks**

None identified at this time.

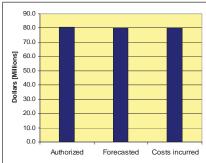

# **Budget Transfers**

None this quarter.

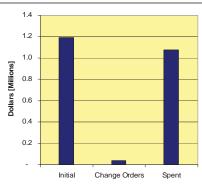

### Status Snapshot Prior Report

Delayed Schedule 2Q 08 Under Budget 1 Change Orders Total Change Orders Amount: \$36,549

### **Budget/Costs Incurred**

# **Construction Costs**

# **Mechanical Infrastructure Project**

Project: C100526 Budget: \$82,520,923 Phase: Close Out Start: 06/27/2000 Completion: 09/15/2008 This program renews, replaces and increases the capacity of the Airport's mechanical infrastructure, including the Central Mechanical Plant and HVAC systems throughout the terminal.

# **Significant Developments**

The last contract for this project, Air Handling Unit #8 is 100% complete with all outstanding punchlist items completed. All equipment was operational before July 4th to satisfy operational needs. This will be the last quarterly report issued for this project.

# Schedule

Project is complete and in close out.

# **Budget**

The project forecast is within the approved budget and authorization.

# **Change Order**

All change orders have been negotiated. A memorandum is being prepared for the Commission for the time extension change order.

# **Risks**

Air distribution systems downstream from Air Handling Unit #8 have deficiencies not covered within contract. Although the new fans are operating within design tolerances, future remedies may be required at the North Security Checkpoint.

# **Budget Transfers**

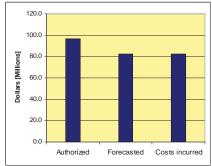

None this quarter.

# **Snow Equipment**

Project: C100615 Budget: \$1,618,039 Phase: Implementation Start: 01/06/2008 Completion: 03/31/2009

# Significant Developments

Purchase snow equipment to facilitate snow removal on three runways and approximately 25 interconnecting taxiways and ramp areas on the AOA. The five new pieces of equipment will add to, and supplement, the current equipment for Aviation Maintenance.

One de-icer truck and sprayer unit and one broom were received in November 2008 in time for the third runway opening. The remaining three trucks and brooms have been ordered and will be received the first quarter of 2009.

# Schedule

The project is currently on schedule.

# **Budget**

A savings of \$218,961 forecasted.

# **Stormwater Management Program**

Project: C101113 C102030, C102108 C800026 Budget: \$60,162,605 Phase: Construction Start: 06/11/2002 Completion: 12/31/2011 The program achieves permit requirements and makes the Airport a leader in stormwater management by construction of flow control, water quality treatment and low stream flow mitigation facilities.

# **Significant Developments**

The stormwater program has entered its adaptive management phase under which additional water quality treatment facilities may need to be implemented based on the requirements of the new upcoming stormwater NPDES permit. An Aviation Stormwater Standards Manual has been implemented.

### Schedule

The new stormwater NPDES permit, with stricter water quality standards, is expected in March 2009. The stormwater pipeliner project has been deferred to 2010.

# **Budget**

The budget has been significantly reduced several times since program inception in 2002 due to successful system optimization measures.

# **Change Order**

None.

# Risks

Additional water quality treatment facilities may be required based on new permit requirements and results of adaptive management analysis.

# **Budget Transfers**

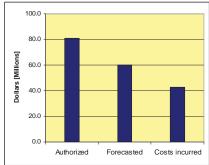

Return to Savings

\$13,921,287

# Status Snapshot

# РНОТО

# **CMP Chiller & Boiler System Upgrades**

Project: C101807, C102144 Budget: \$6,957,000 Phase: Construction Start: 12/11/2001 Completion: 07/15/2008 The project will upgrade and expand the capacity of the Central Mechanical Plant by installing an additional boiler and two new chillers.

# **Significant Developments**

System start-up and testing revealed manufacturing defects in the Port-provided chillers. The problems are being addressed by the manufacturer and Port staff. New division plates for one of the chillers were fabricated and received from a local manufacturer. New plates are to be installed early January 2009 and then the chiller will be retested for design performance. The new boiler is operating per the design, except for some minor warranty problems that the manufaucture is addressing.

# Schedule

The main contract is complete. It is anticipated that the necessary chiller modifications will be completed in the first quarter 2009.

# **Budget**

The project forecast is within the approved budget and authorization.

# **Change Order**

Five change orders have been negotiated for a total of \$134,008.

# **Risks**

The resolution of the chiller equipment problems has increased the project costs. The forecast is currently still within the approved budget and authorization, however, if extensive changes are necessary to achieve the required capacity from the chillers, it could result in an increased forecast.

# **Budget Transfers**

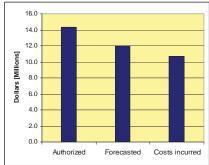

None this quarter.

# **STEP Security Baggage & Checkpoints**

Project: C102003 Budget: \$108,784,460 Phase: Close Out Start: 05/14/2002 Completion: 03/08/2007 This project created automated systems for explosive detection screening of baggage for the south half of the Main Terminal. The systems meet all security requirements, while reducing staffing requirements.

# Significant Developments

The main project is complete and in the process of close out. The only remaining active work project for this program is ongoing monitoring, and making adjustments to improve system performance.

# Schedule

Project is complete.

# **Budget**

Project was delivered under budget.

# **Change Order**

The final settlement change orders were issued in the amount of \$11,065,020 (excluding taxes).

# **Risks**

The TSA has questioned whether they should reimburse us for the settlement change order. Currently the TSA legal department is reviewing the issue.

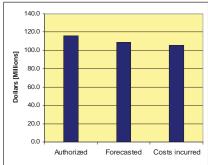

# **Budget Transfers**

Return to Savings \$7,170,000

#### FOURTH QUARTER REPORT, 2008

# Satellite and Concourse Emergency Transformer Replacement

Project: C102034 Budget: \$2,320,827 Phase: Close Out Start: 12/10/2002 Completion: 12/31/2008 This project replaces the Emergency Transformers for the North and South Satellites, and B and C Concourses. This project is part of the on-going program to replace equipment as it reaches the end of its normal service life.

# Significant Developments

The contract is complete. Testing revealed defects with the 5 kilovolt switches the Port supplied. The supplier has replaced the defective switches with a new design. The replacement switch installation was completed in December. The installation has been accepted by Port Maintenance and Engineering. This will be the last quarterly report issued for this project.

# Schedule

Construction is complete and project is in close out.

# **Budget**

The project is anticipating a savings of approximately \$150,000.

# **Change Order**

A final change order was issued this quarter.

# **Risks**

None identified at this time.

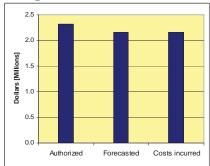

# **Budget Transfers**

None this quarter.

### **Budget/Costs Incurred**

### **Construction Costs**

# **Apron Pavement Rehabilitation - 3**

Project: C102038 Budget: \$16,100,000 Phase: Construction Start: 01/14/2003 Completion: 12/31/2009 Multiyear airfield pavement replacement program. This is a continuation of a program for the removal and replacement of aged airfield apron pavement started in 1994. To date 180,000 square yards have been replaced.

# Significant Developments

The 2008 Project, including Alaska Hangar Apron Construction and Cargo 2/3 Taxilane Apron Replacement was awarded to Gary Merlino Construction for \$4,254,587 and was completed in October 2008.

# Schedule

The 2008 Project is in contract closeout. An additional contract to complete this project is being assembled.

# **Budget**

CIP C102038's Current Budget is currently at \$16,100,000 with cost to date of \$13,299,000. Alaska Hangar Apron Construction's current budget is \$3,646,381 with cost to date of \$3,410,910. Cargo 2/3 Taxilane Apron Replacement's current budget is \$2,396,777 with cost to date of \$1,915,615.

# **Change Order**

# Main Terminal Baggage Screening

**Project:** C102163 Budget: \$230,538,762 **Phase: Construction** Start: 09/24/2002 Completion: 02/13/2009

This project creates automated systems for explosive detection screening of baggage for the north Main Terminal and South Satellite. The systems will meet all security requirements while reducing staffing and providing capacity for future growth.

## Significant **Developments**

The C-1 baggage handling/screening system has been placed into revenue service for Alaska Air Group. Only minor modifications to the system remain.

# **Schedule**

The project was delayed approximately two years from the original completion date due to replacement of the original baggage subcontractor, changing TSA requirements and other scope changes. Since the last report, the schedule for beneficial occupancy has slipped to February 13, 2009 due to minor deficiencies discovered during the winter holiday peak baggage loads.

# **Budget**

The project forecast is within the approved budget and authorization.

# **Change Order**

Credit change orders worth \$289,979 were issued this quarter.

# **Risks**

Risks include recent TSA changes in certification requirements and whether they will be imposed retroactively.

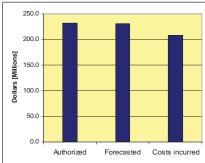

# **Budget Transfers**

None this quarter.

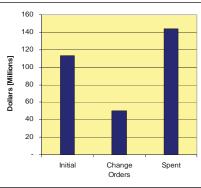

# **Status Snapshot**

# **Parking Tunnel Planning and Design**

Project: C102164 Budget: \$966,500 Phase: Design Start: 10/01/2007 Completion: 12/30/2009 The project is to assess, define, and design the major renewal and replacement of key systems for the parking garage components and service tunnel to extend the life of these assets

# **Significant Developments**

The structural assessment of Service Tunnel indicates it was never designed for major earthquake events. Due to structural complexity, significant retrofit strategies are needed to preserve airport operation. The Parking Garage 8<sup>th</sup> floor water proofing system is beyond its useful life, so a new project was created. The expansion joints in the garage are failing. On-going maintenance costs are increasing. Further structural assessment is needed to determine retrofit strategies for the entire garage. Various infrastructure systems were assessed and reported.

Current estimated costs to rehabilitate the garage and service tunnel to ensure their long term usefulness have increased and are now estimated to be \$30 to \$50 million. That work will be done through future projects.

# Schedule

No change from last quarter.

# **Budget**

The project forecast is within the approved budget and authorization.

#### FOURTH QUARTER REPORT, 2008

# **Garage Floor Count**

Project: C102584 Budget: \$4,087,371 Phase: Testing Start: 08/06/2007 Completion: 02/28/09 This project is part of the Customer Service initiative. The floor count system will display information to assist parking customers in finding parking spaces, especially at times when the garage is near capacity.

# **Significant Developments**

The overall project was deployed on May 20, 2008. Upgrades consisting of additional cameras, camera relocations and software adjustments have been made to the deployed system and are currently being calibrated.

# Schedule

Due to weather related delays, completion of the 8<sup>th</sup> Floor section count will occur by February 27, 2009.

# **Budget**

The project forecast is within the approved budget and authorization.

# **Change Order**

Not Applicable

# **Risks**

Port Information and Communication Technology (ICT) Department is working to improve the accuracy of the count system in sections B and C on floors 5, 6, 7 and 8.

# 3<sup>rd</sup> Runway Residential Acquisition

Project: C200015 Budget: \$34,340,000 Phase: Implementation Start: 05/27/1999 Completion: 06/30/2009 Acquire single/multi-family structures located in the 3<sup>rd</sup> Runway's flight path in the City of Burien to comply with FAA safety rules.

# **Significant Developments**

Phase 1 (17 homes) began in 2003 and completed in 2007. Phase 2 (13 homes) began in 2007 and is expected to be complete in 2009. The final Phase 3 (30 parcels) began in June, 2008, and is expected to be complete during mid-2009. All 30 offers have been presented, 23 owners have accepted, 22 parcels have closed. Runway opened on November 20, 2008.

# Schedule

Property owners have been readily accepting offers from the Port. This is partially due to the current residential real estate market. This is putting this phase of the project work ahead of schedule. Though, the overall project schedule is not forecasted to change.

# **Budget**

The project forecast is within the approved budget and authorization.

# **Change Order**

Not Applicable

# **Risks**

Regional construction costs for demolition have been rising over the last several years. This causes concern that total project costs may exceed original estimates.

**Prior Report** 

3Q 08

# FAR Part 150 Mobile Home Park Acquisition

Project: C200037 Budget: \$47,258,000 Phase: Implementation Start: 02/12/2002 Completion: 06/30/2011 Acquisition of mobile and manufactured home parks, and relocation of associated tenants, to reduce the number of people living in mobile homes within high noise areas.

# **Significant Developments**

The allowable noise level is established by FAA rules and is defined as the 70 decibel day night level (DNL) boundary. Approximately 355 mobile homes in seven parks are affected. Four mobile home parks have been completed. The real property of the remaining 3 parks has been acquired and relocation of the last phase is continuing with approximately 70 tenants remaining to be moved.

## Schedule

Recent real estate trends have created a buyer's market in certain segments. Many tenants are finding replacement mobile home housing faster than anticipated, limiting supply and creating a bubble market in the South King County area. Due to affordability in an otherwise tight market, a limited supply of available mobile homes has been created by the Port's program. In order to keep project costs within budget, the rate of relocation has been adjusted downward slightly. Overall project schedule is not expected to change.

# **Budget**

Costs to relocate tenants include the costs to test, abate and demolish mobile homes is expected to exceed forecasts. Impact on budget is unknown at this time.

# **Change Order**

Not Applicable

# **Risks**

Tight residential housing credit market. Abatement and demolition costs.

#### FOURTH QUARTER REPORT, 2008

# **Highline Community College Noise Insulation**

Project: C200042 Budget: \$10,822,000 Phase: Construction Start: 01/11/2005 Completion: 10/01/2011 Highline Community College Insulation Agreement will provide funding for up to 22 eligible buildings that are impacted by aircraft noise from Sea-Tac Airport. Status SnapshotPrior ReportDelayed Schedule1Q 09On BudgetNo Change OrdersTotal Change Orders Amount:N/A

# **Significant Developments**

Twelve of the 22 eligible buildings have been sound insulated by the college.

# Schedule

Building #19 construction is complete. The schedules for the remaining buildings are dependent on state funding. Funding from the college has been delayed, therefore, delaying the overall project.

## **Budget**

The project forecast is within the approved budget. Building #19 has been completed but we are waiting for the final invoice to pay and close the work project. Authorization of the remaining project budget of \$5,828,402 will be requested from the Commission in the future.

# **Change Order**

Not Applicable

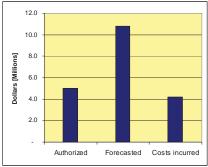

# **Risks**

The Highline Community College competes for state funding with other colleges. If they do not receive adequate funding, projects will be delayed. Estimates for the remaining eight college buildings have not been completed by the college.

# **Budget Transfers**

# **North Expressway Relocation**

Project: C800034 Budget: \$122,920,700 Phase: Construction Start: 07/27/2004 Completion: 06/30/2010

The project is a collaboration between the Port and Sound Transit. It will reconstruct the North Airport Expressway and bring light rail to the Airport.

# **Significant Developments**

The bulk of the work in the current contract is complete, with only punch list work remaining. Improvements include roadway, storm drainage, illumination, signage bridges, a tunnel, retaining walls, utilities, an intelligent transportation system, and landscaping. The contract also constructs a portion of Sound Transit's light rail system including the at-grade section, elevated guideway, and foundations for the Airport Station. The intelligent transportation management system is being implemented by Port staff and a consultant. Future contracts will do final reclamation and landscaping and make other improvements. Bids were opened for the small works project work to restore traffic flows at the Doug Fox Parking Site.

# Schedule

The main contract received substantial completion in August. Punch list work is in progress. Final scope for the last remaining contract is being finalized. All construction will be complete by mid-2010.

# **Budget**

The main contract for \$93,448,650 is being managed by the Port, with the cost shared between the Port of Seattle and Sound Transit at approximately 56% and 44%.

# **Change Order**

Nine change orders were issued this quarter in the amount of \$81,074.

# **Risks**

A subcontractor has requested additional reimbursement for Temporary Erosion Sediment Control outside of a previously settled claim and for wall construction.

# Parking Garage 4<sup>th</sup> Floor Improvements

Project: C800036 Budget: \$8,991,000 Phase: Design Start: 02/14/2006 Completion: 11/24/2009

The project includes the design and construction of a pedestrian bridge and a walkway from Sound Transit's Airport Station to the Terminal.

# **Significant Developments**

The project will be delivered in two contracts; the pedestrian bridge between the Airport Station and the Parking Garage and a walkway on the 4<sup>th</sup> floor of the garage between the pedestrian bridge and northern most sky bridge to the main terminal. The pedestrian bridge advertised for bids late in 2008 and Harbor Pacific was the successful low bidder at \$2,851,000; 14.4% under the estimate of probable cost. Design of the walkway project is at 60% with final design scheduled for completion by March 2009.

# Schedule

The pedestrian bridge contract is currently in the process of being awarded and the expected completion is at the end of 2009. The walkway contract will advertise in spring 2009 with completion planned by the end of 2009.

# Budget

With favorable bid on the bridge, the forecast has been reduced by \$1.4M. Authorization of the construction funding for the 4<sup>th</sup> floor garage walkway will be requested when the design and bid documents are completed.

# **Change Order**

None

# Risks

Coordination between the bridge contract and Sound Transit's Airport Station contract is underway for staging areas and temporary roadway configurations. The level of finish, structural upgrade to the garage, signage, and security features in the walkway are still being evaluated.

# Aircraft Rescue & Fire Fighting Station Upgrade

Project: C800042 Budget: \$5,000,000 Phase: Design Start: 06/13/2006 Completion: 12/31/2009 Upgrade the Sea-Tac International Airport Aircraft Rescue & Fire Fighting (ARFF) station to meet current Airport needs and comply with current safety codes.

# **Significant Developments**

The project was re-scoped and re-advertised for bids in August. Bids were opened in September 2008.

# Schedule

Bids were opened on September 23, 2008 and the low base bid is within budget. The low prime bidder is an MBE firm. Due to budget uncertainties, the bid acceptance period has been extended until January 22, 2009. The Port is evaluating financing options in light of the current economic crisis which has impacted the project schedule. Anticipated construction completion is now December 2009.

# Budget

The project forecast is within the approved budget and authorization.

# **Change Order**

None.

# **Risks**

Although the bids received were within budget, delays in awarding the contract may result in increased project costs. The re-bid project may not be awarded if the financial outlook does not improve by the bid expiration date.

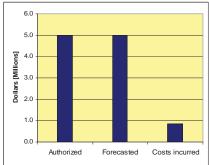

# **Budget Transfers**

None this quarter.

# **Street Vacations - Des Moines Creek 1**

Project: C800046 Budget: \$3,850,000 Phase: Implementation Start: 10/01/2008 Completion: 08/31/2009 Purchase the City of Des Moinesowned streets in the Des Moines Creek Business Park site that are surrounded by Port-owned property. This acquisition will enable the Port to develop the business park site.

# Significant Developments

Per our agreement with the City of Des Moines, the amount owed the City has been deposited into an escrow account pending satisfaction of all the conditions required for closing.

# Schedule

Acquisition is expected to be completed by 8/31/09.

# Budget

The project forecast is within the approved budget and authorization.

# **Change Order**

Not applicable.

## **Risks**

All the conditions required for closing--most notably, the Des Moines City Council's approval of the developer's master plan--are not yet met. The Port may terminate the agreement if City approval does not occur and retain the allocated funds.

# Main Terminal South Sub Low Voltage

Project: C800061 Budget: \$1,925,000 Phase: Design Start: 06/28/2007 Completion: 01/14/2011 This project covers the renewal and replacement of low voltage (600 volts and below) electrical distribution equipment in the southern part of the Main Terminal.

# **Significant Developments**

Incorporation of 100% design review comments is underway. Scope of work reduced in order to stay within budget. Once final bid-ready documents are completed, project will be deferred until further notice. Design delays were due to interpretation of the new 2008 code rules and development of implementation phasing plan to minimize electrical outages and impacts to tenants and travelling public.

## Schedule

Once design is complete, project will be put on-hold until funding is available.

# **Budget**

The project forecast is within the approved budget and authorization. The designer has made some adjustments to the scope of work to stay within budget.

# **Change Order**

None.

# **Risks**

In order to reduce RMM abatement impacts to project schedule, the RMM contractor will be required to add additional crews to complete work in a timely manner. It is not known when construction will proceed. There may be an impact on project costs due to changes in market conditions at that time.

# **Consolidated Warehouse**

Project: C800071 Budget: \$9,000,000 Phase: Construction Start: 06/27/2006 Completion: 03/31/2010 This project will construct a 50,000 square foot warehouse for storage and inventory management of spare parts for the Aviation Maintenance Department.

# **Significant Developments**

Panattoni Construction has grubbed and preloaded the site. Preload has attained the required compaction of soil. Midway Sewer piping permit has been issued. Highline Water District has reviewed and commented on civil construction documents, revisions are being made.

# Schedule

Project is on schedule.

# **Budget**

The project forecast is within the approved budget and authorization.

# **Change Order**

Construction bulletins have been issued for: 1. Roofing that will provide a better life cycle cost, 2. Manhole required by Midway Sewer District, and 3. Contractor requested roof framing.

# Alaska Air 2-Step Ticket Counter

Project: C800095 Budget: \$10,707,000 Phase: Construction Start: 04/11/2006 Completion: (See C102163) This project provides Port of Seattle support for Alaska Airlines' 2-step ticket counter projects (the "Airport of the Future"). The work includes: asbestos abatement; concessions relocations; and related building modifications.

## **Significant Developments**

The Port work to support of the opening of Alaska ticket pod 5 is complete. This is the last facility to be activated.

#### Schedule

This project supports major tenant projects and is linked to the C-1 baggage system project. Delays in those projects have resulted in delays to substantial completion of this work. Alaska Airlines placed Pod 5 into operation in November 2008.

## **Budget**

The project will incur additional costs over the current budget for Port performed tasks which will be reimbursed by Alaska Airlines. After reimbursement, the anticipated forecast is within the approved budget and authorization.

# **Change Order**

Not Applicable.

#### **Risks**

The combined work between the Port and Alaska Airlines is dependent on the phased completion of the C-1 baggage system project.

# **Airport Owned Gate Infrastructure**

Project: C800105 Budget: \$6,000,000 Phase: Design Start: 07/24/2007 Completion: 12/31/2009 This project purchases and replaces loading bridges at gates throughout the airport.

# **Significant Developments**

Gate designs at three of the gates are complete and the Airport building permits have been issued. Of all the bridges, S2 is the most urgently in need of replacement. Three bridges have been purchased. Purchase of the two remaining bridges will be placed on hold until June of 2009.

## Schedule

Loading bridges are ready to ship from the factory. Foundation design is complete for three loading bridges. The anticipated installation of the first three loading bridges has been deferred until first quarter of 2009 so that construction will occur after the holiday travel season.

## **Budget**

The project forecast is within the approved budget. In October, the Commission authorized \$1,917,000 (for a total authorization of \$4,337,000) for a total for five loading bridges. The remaining budget will be authorized in a following phase to replace additional bridges and make other gate improvements in the future.

# **Significant Developments**

The 100% design is nearing completion and is scheduled to be issued for design review in February 2009. Once review is complete and final bid-ready documents are completed, the project will be deferred. Design delays were due to interpretation of the new 2008 code rules relative to UPS systems.

# Schedule

Once design is complete, project will be put on-hold until year-end 2009.

# **Budget**

The project forecast is within the approved budget and authorization.

# **Tenant Reimbursement**

Project: C800154 Budget: \$4,709,577 Phase: Construction Start: 08/14/2007 Completion: 03/31/2010

# Significant Developments

Build out of spaces for new and existing tenants. If more than a "basic finish" condition space is built for the tenant, the tenant is required to reimburse the Port for the cost of the work beyond this "basic finish". These reimbursements are allowed under the guidelines described in the "Tenant Reimbursement Policy".

Construction of new office space by Hawaiian Airlines was completed in 4<sup>th</sup> Quarter 2008. The Port's reimbursement for Hawaiian is still pending.

Virgin America reimbursement is scheduled for 1<sup>st</sup> Quarter 2009. Port construction of the TSA Mezzanine Office Project is complete. Accounting interpretation of reimbursements back to the Port from tenants will be considered extraodinary revenue and will not credit reimbursement to the project.

# Schedule

The work has been completed on schedule to meet the tenants needs.

# Budget

Virgin America's \$407,000 in reimbursements was approved by the Commission and payment is scheduled by the end of January 2009.

\$1,091,000 in reimbursement to the Port is anticipated from TSA in 1<sup>st</sup> Quarter 2009.

# **Runway 16L/34R Reconstruction**

Project: C800167 Budget: \$85,000,000 Phase: Construction Start: 02/26/2008 Completion: 12/31/2009 The scope of this project includes the complete reconstruction of Runway 16L/34R (the eastern runway) and replacement of aging infrastructure.

# **Significant Developments**

Runway 16L/34R Reconstruction project was advertised on Dec. 22, 2008. The project includes reconstruction of 11,900 foot runway and portions of five taxiways. Related work includes pavement demolition, excacavation, grading, portland cement concrete and asphalt concrete paving, storm drainage, water mains and flush fire hydrants, electrical ductbanks, airfield lighting systems and guidance signs. A project with improvements to Taxiway P was awarded to ICON Materials and completed in August 2008. The Taxiway P improvements will facilitate the Runway 16L/34R reconstruction in 2009.

## **Schedule**

The final design documents for the 2009 Runway 16L/34R Reconstruction's advertisement were completed in late December. Bid opening is schedule for January 20, 2009. Reconstruction is scheduled to start in mid-March and to be completed in late October 2009.

# **Budget**

Taxiway P Modifications's current budget is \$1,142,183 with costs to date of \$820,707. \$2,000,000 was authorized on 02/26/2008 and the remaining \$83,000,000 was authorized by the Commission on 10/28/2008.

# 2<sup>nd</sup> Floor HVAC Upgrades

Project: C800249 Budget: \$1,360,000 Phase: Design Start: 03/25/2008 Completion: 01/31/2010

Significant Developments Construct a new Heating Ventilating and Air-Conditioning (HVAC) air supply duct system to the north side of the second floor of the central main terminal administration building and the concessions located directly below on the ticketing level.

# The 90% design review has been completed. 100% documents are due by late January 2009.

# Schedule

No new schedule delays. Schedule delayed last quarter by 8 weeks due to redesign of duct routing primarily on the main terminal roof and to provide additional HVAC to under-served office area per initial 90% review comments.

# Budget

Based on completion of 90% design review, anticipate request in first quarter 2009 for increase in construction cost of \$137,000 to improve efficiency to HVAC air handler system, elevate rooftop duct routing to eliminate roof access restrictions, and install temporary duct for adjacent air handler to eliminate impacts on existing tenants during construction. Authorization of construction funding and authority to advertise for construction will be requested when the design and bid documents are completed.

# **Terminal 30/Terminal 91 Program**

Project: C80085 Budget: \$121,525,000 Phase: Construction Start: 10/2/2007 Completion: 5/1/2009 Redevelopment of Terminals 25/28/30 into one combined container facility. Relocation of the existing T30 Cruise operations into a new facility at T91, and related facility improvements and berth dredging.

# Significant Developments

T91: As of the end of December, Terminal 91 cruise terminal building construction is approximately 90% complete. Drywall installation is nearly complete with much of the second level walls painted. Start-up of air handling units and HVAC system continues. Permanent light fixtures are mostly in place and trim work underway. Plumbing fixtures are being installed throughout the building. Escalator and elevator commissioning process continues. Balcony topping slabs are in place. Seattle City Light shore power agreement is finalized. Coordination continues with City of Seattle on city street sign fabrication and installation. Cruise building and terminal yard signage contract advertised and bid opening scheduled for January 14th. (Continued on Page 2).

# Schedule

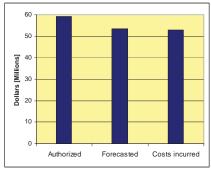

T91: The building contractor is projecting beneficial occupancy of the cruise terminal building on February 18, 2009 with temporary certificate of occupancy occurring a couple of weeks earlier if necessary. Snow events during late December had minor impacts to the construction schedule.

The T91 facility is still on-schedule to be available to receive its first vessel on April 24, 2009. The period between beneficial occupancy and operations will be used to allow move-in and other activities to occur. (Continued on Page 2).

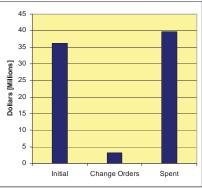

#### **Status Snapshot**

On Schedule On Budget 164 Change Orders Total Change Orders Amount: \$3,172,324

#### **Budget/Costs Incurred**

# **Construction Costs**

# Budget

The current program budget is \$121.5 million which includes 3.2 million for the foundation change. The program forecast is \$119.3 million.

The \$3.2 million foundation change is provisional and will only be released as the T91 contingency is exhausted.

# Change Order

There were 23 change orders this quarter for a total of \$1,494,598.

# **Risks**

T91: Shore power installation and mobile gangway fabrication need to be fully completed and commissioned prior to start of 2009 cruise season.

T30: Severe weather conditions have impacted this project in December.

# **Budget Transfers**

None

# Significant Developments, continued

T30: The T30 major construction is 68% complete. Construction on Phase 2 commenced in mid-October and is progressing on schedule and on budget. The contractor GCC has notified the Port of schedule impacts due to severe weather between 12/18/08 thru 12/30/08.

Concrete pile driving is complete. North end substation is nearly complete. Concrete work for truck scales in progress. Storm drain installation at reefer rack and equipment slab is complete and storm drain under cruise building in progress. Longshore building re-model in progress and form work below deck at waterside crane beam is complete.

# Schedule, continued

T30: The project is impacted by severe weather and unforeseen conditions, and the contractor is in the process of evaluating impacts and necessary recovery plans. Currently, the Beneficial Occupancy date for the T30 Container Terminal remains May 1, 2009.

# **T91 Berth M Replacement**

Project: C800089 Budget: \$10,654,000 Phase: Close Out Start: 9/21/2007 Completion: 5/30/2008 Replace remaining timber portion of Berth M apron structure with a concrete/steel pile supported concrete apron structure.

# **Significant Developments**

Construction completed as of 5/30/2008 and the new apron is in use. Port Construction Services completed drainage improvements under the Magnolia Bridge during this period; and claim negotiation finished on issues relating to micropile and augercast pile installation.

# Schedule

Project is in the close-out phase.

# **Budget**

Forecasted under budget

# **Change Order**

Contractor has four change orders to sign, should be executed in the first quarter 2009.

# **Risks**

None.

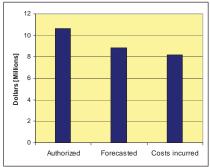

# **Budget Transfers**

# **T-5 Crane Spreader Replacement**

Project: C800123 Budget: \$525,000 Phase: Construction Start: 10/24/06 Completion: 3/31/2009 To replace two crane cargo spreader beams that are beyond their useful life. Spreader beams are terminal equipment used to move containers to and from ships and trucks.

# **Significant Developments**

Bids received near the end in Q3 2008. All bids were determined to be non-conforming. Project will re-bid 1Q2009.

# Schedule

Schedule adjusted to reflect re-bid. Estimate completion date is 4Q 2009, 9 months later than previously thought

# **Budget**

CIP 800123 is funded for \$2,897,000. The Commission approved Work Project budget for procurement of 2 spreader beams is \$525,000. A request for additional authorization of the balance of funding is schedule for later this year.

# **C15 Sewer Line Upgrades**

Project: C800125 Budget: \$600,000 Phase: Construction Start: 4/1/2008 Completion: 3/31/2009 Replace the failing sewer/drain lines under the Fisherman's Terminal C-15 West Building

# **Significant Developments**

Performed ground penetration radar imaging to determine location of drain lines that were not accurately detailed in the existing as-built drawings.

# Schedule

Project is behind schedule due to unforeseen conditions. Small works contracting for additional tunnel work will delay construction until early May 2009. New project schedule end date is June 30, 2009, 3 months longer than previously reported

# **Budget**

Cost to date \$385K. Project 80% complete.

# **Change Order**

No new change orders.

# **Risks**

Project construction may impact tenants during busy summer season.

# **T25 South Redevelopment**

Project: C800259 Budget: \$4,377,513 Phase: Construction Start: 11/2007 Completion: Indefinite Redevelopment of former cold storage facility site at south end of Terminal 25 into container terminal yard.

# **Significant Developments**

Phase 1 lighting installation and Phase 2 design and permitting completed. Phase 2 construction put on hold indefinitely.

# Schedule

Phase 1 self performed has been substantially completed - including lighting installations which were delayed due to long lead time for 100' poles - with the exception of a final fencing modification. Phase 2 design and permitting were completed by December 2008. Phase 2 bidding, contract award, and construction were put on hold indefinitely in December 2008 due to SSA and Port being unable to agree on terms of property lease agreement.

# Budget

\$4.4 million authorization and project spending to date is for permitting, design, project management, and Phase 1 construction. Final total cost, including construction, is currently estimated at \$17.2 million. Commission approval for Phase 2 construction costs will be requested if, and when, lease issues are resolved with SSA.

# **T91 Mobile Gangways**

Project: C800273 Budget: \$6,460,000 Phase: Construction Start: 6/24/2008 Completion: 4/30/2009 Construct two mobile gangways and the associated support infrastructures for the new T91 Cruise Terminal.

# **Significant Development**

Cruise lines and mobile gangway stateholders wanted additional range of movement for the vessel walkway and more mechanized building walkway system. This will provide added safety to the end users and less operating costs. Therefore additional design was necessary.

# Schedule

100% design package for the main gangway structure and vessel walkway was completed. Additional design for the building walkway will be completed in January 2009. Project on track to have the gangways delivered, commissioned and ready for use by the 2009 cruise season.

# **Budget**

As a result of the design changes, additional structural members are needed and fabrication costs for the new design elements have not been fully negotiated.

# Change Order

Two change orders for a total of \$177,620.

# **Risks**

Authorized funds should be adequate to cover fabrication costs of the new design elements. The estimate will be refined and finalized in first quarter 2009.

# **Budget Transfers**

# **East Marginal Way Grade Separation**

Project: Public Expense 102007 Budget: \$34,500,000 Phase: Design Start: 5/2006 Completion: Q4 2010 FAST Corridor funded project; FHWA, State, City with Port commitment of \$1.6 mil. Scope is to construct grade separation in vicinity of T5 and T18 to minimize truck traffic/rail conflicts.

# **Significant Developments**

Seattle City Light relocation efforts continue with pole foundation contract award. Expected relocation complete in mid-June 2009. constrants. Funding partners continue to express concern but have accepted current plan to advertise project for bids pending Port Commission authiorization.

# Schedule

As previously reported, completion schedule revised due to utility relocation delay. Schedule recovery strategy includes establishment of several construction contracts. Overall project completion delay remains at 2.5 years, 1Q11

# **Budget**

Budget overrun anticipated due to projected cost increases of Seattle City Light facilities relocations and inflation factor of associated delay. Other funding sources are being actively sought. Column relocation construction contract has been terminated to reduce cost obligation to complete the project.

# **Change Order**

None

# **Risks**

Additional delays trending to increase overall project costs based upon uncertain inflation factors. Seattle City Light cost estimates are increasing and schedule slipping.

# **Budget Transfers**

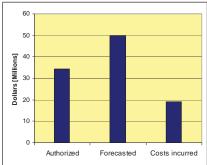

Potential transfers from other Port FAST Corridor commitments

# **Terminal 46 ZPMC Gearboxes**

Project: Expense 103705, 103706,103707 Budget: \$1,227,000 Phase: Construction Start: 8/22/2007 Completion: 12/31/2009 This project is for the implementation of contingency plans to keep the three port owned ZPMC cranes located at Terminal 46 operating while the cause of failing gearboxes is investigated

# Significant Developments

Two (2) spare gearboxes and a spare gearwheel assembly have been purchased and are being stored in anticipation of the next failures. In order to continue with contingency plans, additional funds (\$350,000) were requested and approved in December.

# Schedule

Crane 81 is trending toward failure mode based on vibration testing and hours of operation. We are continuing to work with our consultants, the designer, and the manufacturer to identify failure cause and determine permanent fix.

# **Budget**

Project spending to date includes purchase of spare gearboxes and parts, reimbursement to tenant for costs incurred to make repairs, and monthly monitoring of vibrations and oil quality to document failure trends.

# **Change Order**

None this quarter.

# **Risks**

Additional gearbox failures would result in further disruptions to operations.
