MESSAGE BAR

To Whom It May Concern:

I am writing this letter on behalf of the office of Port Jobs organization. I manage the Massage Bar at the airport and have been with the company for 10 years. I have had the pleasure of working with Trena and the Port Jobs staff for the last 4 years.

On several occasions, I have sent my employees to the Airport Jobs office for assistance in various aspects of their life, whether it is for finding a part time job to supplement their income from the Massage Bar or finding assistance getting day care or reliable transportation. I have used their services to help me prepare my taxes. Anytime someone from the airport comes to me with questions about getting any kind of assistance I take them to the Jobs office.

The Jobs Office also helps bridge a gap between Highline Community College and employees at the airport. Having classes offered at the airport makes a huge difference in someone being able to take classes. Many people don't have the transportation or the time to get to the campus, by having the classes offered at the airport makes the classes attainable. I have taken computer courses through this program, and honestly I would not have gone to the campus to take them because of my time constraints and the convenience of having them offered at the airport. Offering these classes is just one of the many services that Port Jobs and the Airport University staff works so hard to offer to employees of the airport.

I hope to see the services Port Jobs offers continued. It would be a huge loss to not be able to offer their services to the public and to our employees not to mention the impact it would have to the employers at the airport. We as employers utilize the office to post our open positions and appreciate the help in getting applications filled out and given to us. Also being able to use the office on Mondays to conduct interviews and meetings is another great asset the Jobs Office provides to employers.

Thanks you for your time in reading my letter. If you have any further questions please feel free to contact me.
