

Exhibit	"D"
Port Commission	Special
Meeting of	Feb. 2, 2010
Work session of	

- Good afternoon Port Commission and staff.
- My name is Tom Gut, PW Director for the City of SeaTac
- Thank you for the opportunity to address you this afternoon.
- I am here representing the City and its #1 transportation priority: completion of SR 509 and its connection to I-5.
- We believe that the AWV MOA represents the largest Port contribution to a public roadway project
- We see many of the benefits and objectives of the AWV identified in the MOA as being the same as the 509 completion project.
  - Improves freight mobility
  - Connects the Duwamish industrial area, STIA and I-5
  - Supports international trade, aviation, economic development, tourism and passenger terminal activities.
- The 509 completion project currently has solid local support and lacks some of the drama of other regional projects. The 509 project completed its Federal environmental review and received a Record of Decision.
- The 509 projects provides many benefits of regional, state and national significance:
  - #1 rated FMSIB rated project
  - It improves safety and congestion relief of the I-5 corridor. According to WSDOT, the increase to roadway capacity will save drivers \$100m annually and freight shippers \$60m annually
  - It also enables SA to STIA which improves freight and traveler access to the airport.
- We respectfully request that if the MOA is approved, the commission would also consider a significant Port contribution to the 509 completion project *at the appropriate time*.
- We ask that that magnitude of the Port contribution to AWV not preclude a Port contribution to the 509 project in the future.
- Again, thank you for the opportunity to address this afternoon.
