Seattle, WA 98121

Exhibit C
Port Commission
Regular Meeting of
January 10, 2012

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Jayson Luu
10455 62nd Ave S.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Amy Jo Heyneman

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

John Shaffer

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Mr. Scott Bishop

Furthermore, the problem is not confined to cruise ships: I just spent a month on a commercial fishing boat (purse seiner) and can testify that all sewage waste on most fishing boats goes DIRECTLY into the water, EVEN WHEN THE BOAT IS SITTING AT THE DOCK. That is a dreadfully backwards practice, to say the least, in 2011.

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Samantha Novak

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Thomas Swoffer

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Judy Palmer

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Nancy Farnam

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

As a resident of Bainbridge Island, and as a summer resident of San Juan Island, I am very concerned about the pollution caused by the many cruise ships in our local waters. I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Mary Ferm

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors. Don't let it happen !!!!

Sincerely,

Ken Woolard

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Cruise ships need to behave like motor homes: you only discharge your sewage at designated recycling locations. Alternatively you can build your own sewage treatment plant on board the ship and recycle water or discharge only cleaned effluent.

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

carl mcgarry

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

Just today I heard a report on KUOW regarding the oil waste found in the Sound every year. I understand that dead orcas must be disposed under "toxic waste" protocols because of the poison build up in there systems. Our Sound is under siege from many sources. At least banning cruise ship wastewater discharges is one way of working toward cleaning it up.

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Bill Helton

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Nicole Fox

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

constance rodman

This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

James Mulcare

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Cynthia Davis

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Jan Zelenak

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Raelyn Michaelson

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Lynne Treat

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am taking the time to write to you personally in order to urge as strongly as possible to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound.

Without this regulation, cruise ships are using our Puget Sound as an easily accessible, cheap open sewer. This is not acceptable -- why should Puget Sound's people, and its birds, fish, and other wildlife, have to pay the cost these cruise ships are shrugging off?

Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, I call on you to act forcefully now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Mr. David Young

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Kristin Fernald

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Mark Resnick

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood.

An article in the Seattle pi cited the following: "In a single day, the federal Environmental Protection Agency estimates passengers aboard a typical cruise ship will generate:

21,000 gallons of sewage

1 ton of garbage

170,000 gallons of wastewater from sinks, showers and laundry

More than 25 pounds of batteries, fluorescent lights, medical wastes and expired chemicals (based on average fleet data from 1999 and 2000)

Up to 6,400 gallons of oily bilge water from engines

Four plastic bottles per passenger -- about 8,500 bottles per day for the Carnival Spirit

Cruise ships incinerate 75 to 85 percent of their garbage, the EPA found in a 2008 study.

That contributes to smog in coastal communities and on the ocean. Ships also release incinerator ash and sewage sludge -- blobs of concentrated toxins from the bottom of waste-treatment facilities -- into the ocean.

They contribute nutrients, metals, ammonia, pharmaceutical waste, chemical cleaners and detergent to deep marine environments from sewage-treatment systems that either don't work as planned or aren't able to remove such substances, according to tests in Washington and Alaska, interviews with state officials, the EPA study and information provided by the Olympic Coast National Marine Sanctuary. "

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Janet Blumer

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Michelle Hirsekorn

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Jill Heishman

This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Daniel Nunez

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Andrea Learned

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Fanny Marchevsky

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Carolyn Hathaway

DoE, Port officials, and Northwest & Canada Cruise Ship Association:

All across the Puget Sound, we are fighting against the damages to the shoreline and marine areas create by our own past bad practices. To make up for all our past polluting actions, we need to be especially careful to stop all new harm and prevent any additional pollution.

That is why I urge you to amend and improve the Cruise Memorandum of Understanding ("MOU") proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be outright BANNED in all of Puget Sound and all waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Rebecca Bartlett

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Vera da Vinci

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

I can't believe that wastewater has been allowed to be discharged into a relatively closed system like Puget Sound that so many people, and other animals, depend on for food and survival.

Not that I advocate dumping such pollutants into any water system, but if anything, it should be held until ships are in open oceans where the circulation can better handle the concentration of waste.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Seattle, WA 98121

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Danielle McKenzie

This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Peter Sturtevant

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Ms. kathy seabrook

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Patricia Ohashi

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am taking the time to write to you personally in order to urge as strongly as possible to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound.

Without this regulation, cruise ships are using our Puget Sound as an easily accessible, cheap open sewer. This is not acceptable -- why should Puget Sound's people, and its birds, fish, and other wildlife, have to pay the cost these cruise ships are shrugging off?

Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, I call on you to act forcefully now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Sigrid Asmus

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Mark Beringer

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Kristin Fernald

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Kevin Schmidt

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood.

An article in the Seattle pi cited the following: "In a single day, the federal Environmental Protection Agency estimates passengers aboard a typical cruise ship will generate:

21,000 gallons of sewage

1 ton of garbage

170,000 gallons of wastewater from sinks, showers and laundry

More than 25 pounds of batteries, fluorescent lights, medical wastes and expired chemicals (based on average fleet data from 1999 and 2000)

Up to 6,400 gallons of oily bilge water from engines

Four plastic bottles per passenger -- about 8,500 bottles per day for the Carnival Spirit

Cruise ships incinerate 75 to 85 percent of their garbage, the EPA found in a 2008 study.

That contributes to smog in coastal communities and on the ocean. Ships also release incinerator ash and sewage sludge -- blobs of concentrated toxins from the bottom of waste-treatment facilities -- into the ocean.

They contribute nutrients, metals, ammonia, pharmaceutical waste, chemical cleaners and detergent to deep marine environments from sewage-treatment systems that either don't work as planned or aren't able to remove such substances, according to tests in Washington and Alaska, interviews with state officials, the EPA study and information provided by the Olympic Coast National Marine Sanctuary. "

This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Craig Thorne

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Michelle Hirsekorn

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

kim groom

This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Billy Hooker

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Chas Klein

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

William W Haywood

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Lynaia Liptak

Port Townsend, WA 98368

Department of Ecology, State of Washington
3190 160th Avenue SE
Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Susan Welenofsky

Department of Ecology, State of Washington
3190 160th Avenue SE
Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Bea Soss

DoE, Port officials, and Northwest & Canada Cruise Ship Association:

All across the Puget Sound, we are fighting against the damages to the shoreline and marine areas create by our own past bad practices. To make up for all our past polluting actions, we need to be especially careful to stop all new harm and prevent any additional pollution.

That is why I urge you to amend and improve the Cruise Memorandum of Understanding ("MOU") proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be outright BANNED in all of Puget Sound and all waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Ms. Mary Fields

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Jennifer Fenswick

I can't believe that wastewater has been allowed to be discharged into a relatively closed system like Puget Sound that so many people, and other animals, depend on for food and survival.

Not that I advocate dumping such pollutants into any water system, but if anything, it should be held until ships are in open oceans where the circulation can better handle the concentration of waste.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Larry Mahlis

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Mark Webber

This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Johni Prinz

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Amanda Mikalson

Department of Ecology, State of Washington
3190 160th Avenue SE
Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Ms. Brenda Michaels

Furthermore, the problem is not confined to cruise ships: I just spent a month on a commercial fishing boat (purse seiner) and can testify that all sewage waste on most fishing boats goes DIRECTLY into the water, EVEN WHEN THE BOAT IS SITTING AT THE DOCK. That is a dreadfully backwards practice, to say the least, in 2011.

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Federico Prado

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Rachel Fredericks

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

kevin orme

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

gretchen mcllarky

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

melodie martin

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Barbara Wollman

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Amy Boatright

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Mr. Ken Zirinsky

Cruise ships need to behave like motor homes: you only discharge your sewage at designated recycling locations. Alternatively you can build your own sewage treatment plant on board the ship and recycle water or discharge only cleaned effluent.

Sincerely,

Andrew D. Whitmont

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Madeleine Sosin

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

Just today I heard a report on KUOW regarding the oil waste found in the Sound every year. I understand that dead orcas must be disposed under "toxic waste" protocols because of the poison build up in there systems. Our Sound is under siege from many sources. At least banning cruise ship wastewater discharges is one way of working toward cleaning it up.

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

jan sundquist

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Janet McGregor

This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Joyce Hancock

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Ralph Drake

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

penny simpson

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Harry Ison

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Bellevue, WA 98008

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Werner Bergman

Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Pawnee Furra

Dear Department of Ecology, Port of Seattle and Northwest & Canada Cruise Ship Association:

Our shellfish industry is so vital to our communities.

I am writing today to urge you to support the amendment to the Cruise Memorandum of Understanding proposed by Friends of the Earth, Puget Soundkeeper Alliance and People for Puget Sound. Cruise ship wastewater dumping should be banned in all of Puget Sound and waters covered by the MOU.

The U.S. EPA has found that even with treatment systems, cruise ships can discharge wastewater in excess of federal water quality standards. Harmful pollutants, including fecal matter, bacteria and other hazardous wastes, are contained in sewage and gray water dumped from the increasing numbers of cruise ships. This pollution damages the aquatic life of Puget Sound and can also contaminate the shellfish and other seafood I consume.

The Puget Sound Partnership's Action Agenda calls for establishing a No Discharge Zone for all vessels in Puget Sound. If we are going to achieve Puget Sound recovery by 2020, you should act now to halt all cruise ship wastewater discharges.

Please adopt the proposed amendment to provide the strongest protection possible for the waters of Puget Sound and for the health of residents and visitors.

Sincerely,

Sheri Staley
