

# EXHIBIT B

## Existing Main Terminal Post-Security Freight Elevator Capacity

Item No. 5b

Date of Meeting October 23, 2012

**FREIGHT ELEVATOR**  
Concourse D Freight Elevator is difficult to access due to heavy baggage make-up area traffic & congestion. Requires transitioning heavy pallets up & down fairly steep ramps due to the elevation differences between elevators.  
Note: Most deliveries are happening at busiest time in the bagwell.

**FREIGHT ELEVATORS**  
Concourse A Freight Elevators are too remote for general use
