

**MOTION 2020-04:  
A MOTION OF THE PORT OF SEATTLE COMMISSION**

directing the acceleration of the sound insulation program  
at Seattle-Tacoma International Airport.

**ADOPTED  
FEBRUARY 25, 2020**

**INTRODUCTION**

On October 11, 2013, Resolution No 3683 was passed by Commission approving the Part 150 to be submitted to the FAA for review. The FAA issued a P150 record of approval June 5, 2014. While past implementation was limited due to funding availability, significant work was completed. However, critical elements of the program remain. Accelerating the remainder of sound insulation programs is essential to providing relief to those local communities impacted by aircraft noise.

**TEXT OF THE MOTION**

The Port of Seattle Executive Director shall take necessary actions to accelerate the airport sound insulation program no later than 2026. The Executive Director shall implement the recommended structure, staffing, funding, resources, consulting, and contracting to ensure a timely delivery of the program. Port staff shall brief the Commission Aviation Committee regularly on progress on the development of the program and implementation.

The Port shall also continue staff efforts to coordinate with other public agencies to ensure that our sound insulation program is complementary to, and not duplicative of nor harmful to, other public agency programs intended to provide low income housing, energy upgrades, and other community benefits.

The Port shall update the Commission on a preliminary implementation plan of the approval of the 2021 budget.
