

Cargo 161D Building Modifications

Seattle-Tacoma
International Airport
March 24, 2020

Project Purpose

- Project purpose is to help relieve unmet demand for airside cargo handling access by re-purposing this cargo building into the AOA.

Project Scope

- Two cargo bay doors will be reconfigured into a single wide opening with new roll up door.
- Construction of a sloped ramp from the truck bay level to ground level to provide ground equipment access into/onto the Air Operations Area (AOA).
- Upgrade lighting above door opening.

Bays 17 and 18 to
be combined into
single door
opening with ramp
from ground level
