Here is my testimony today - thank you!

This is Laura Gibbons, a member of the 350 Seattle aviation team.

I am thrilled that the Port has a goal in their Century Agenda to “Be the greenest, and most energy efficient port in North America”. The work that has been done for Scope 1 and Scope 2 around SEATAC is quite impressive.

However, for Scope 3, just comparing ourselves to other airports isn’t going to be enough. Unchecked increase in aviation means those numbers will be steadily rising, making it completely impossible to meet climate goals. Furthermore, Scope 3 only considers the climate impacts of aircraft during approach, take-offs, and climb-out, not the CO2 and other harmful impacts of ALL the fuel that is pumped and uploaded at SEATAC.

This is the Century Agenda, and humans won’t be around another Century if we keep this up. I urge you to revise the Century Agenda goal to reflect the realities of aviation and climate change.

Thank you for signing up to give public comment via Skype at the May 26, 2020, Port of Seattle Commission meeting.

Join us via your mobile or laptop device on Skype or call into the number provided below at **11:45 a.m. PST** on Tuesday May 26, 2020 in order to be marked present and ready to speak. A member of port staff will join the call to take a roll call of the names we have listed and go over the procedure. Please plan to call from a location with as little background noise as possible.

You should expect to be on the line for between 30 minutes to an hour as we dispose of preliminary business and hear from other speakers. While it’s not possible for us to predict how many people will comment on May 26, we expect individual comment time to be limited to two minutes and all rules of order and decorum will apply as usual.

If you have any questions please let us know. We appreciate your dedication to public health and your interest in participating in the Port of Seattle Commission meeting.
