

Airport Food and Beverage Introductory Kiosk Project

Design Authorization

Dawn Hunter, Sr. Manager Airport Dining and Retail
JJ Jordan, Project Manager

Small Business Kiosk Program

Project Overview

- Robust design competition that will yield the best aesthetic for the airport in line with SEA's architectural vision
- Design competition will incorporate innovations for defining rotating tenants
- Port constructed and maintained kitchen
- Infrastructure can be utilized by rotating tenants

Justification

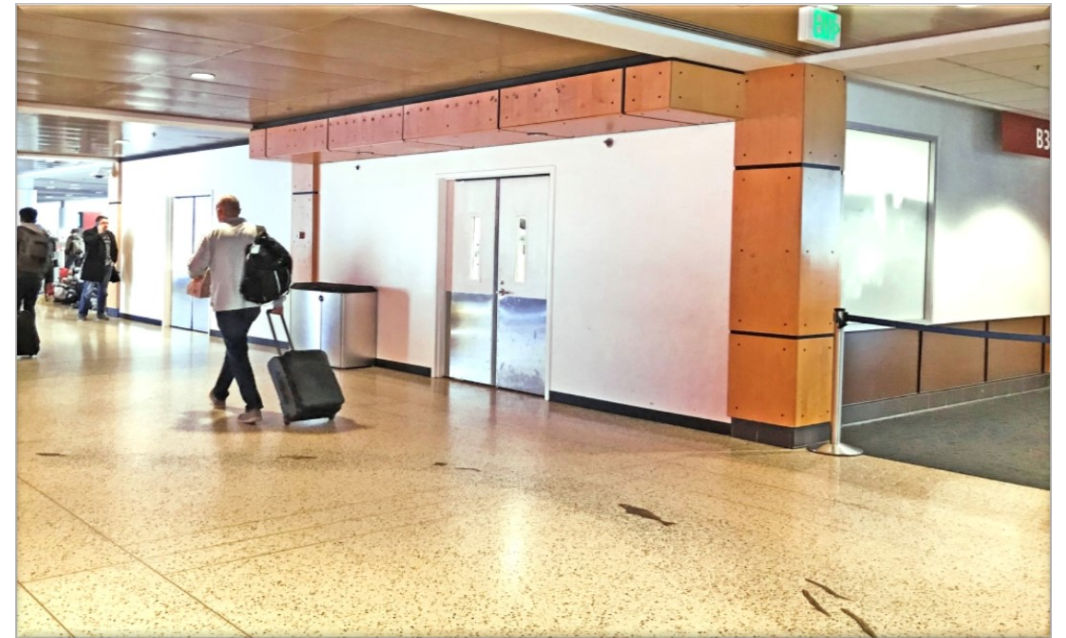

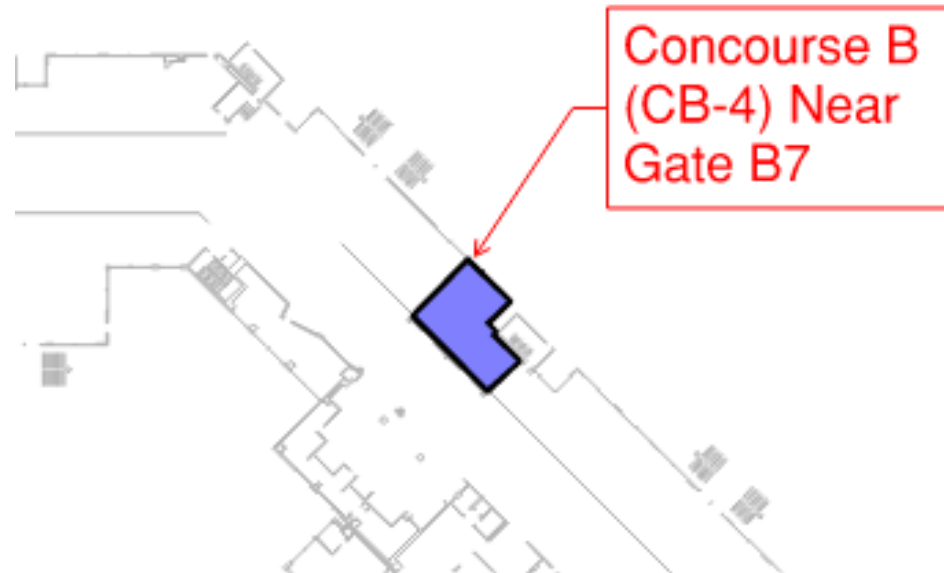

Commitment to Small and Minority Businesses

- Incorporate food and beverage into kiosk program for small business
- Reduce tenant's cost of development compared to a traditional space
- Provide SEA customers with diverse local dining options
- Create new stream for non-aeronautical revenue
- Create opportunities for small and minority businesses for mentoring and advancement

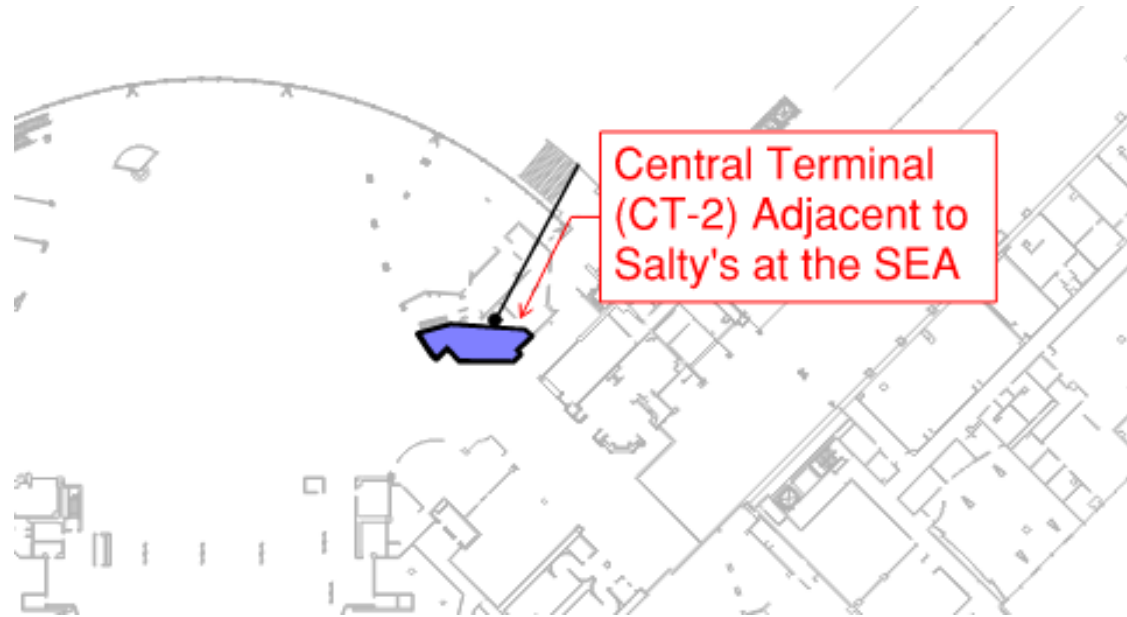

Locations

Concourse B (CB-4) | Between B3 & B5

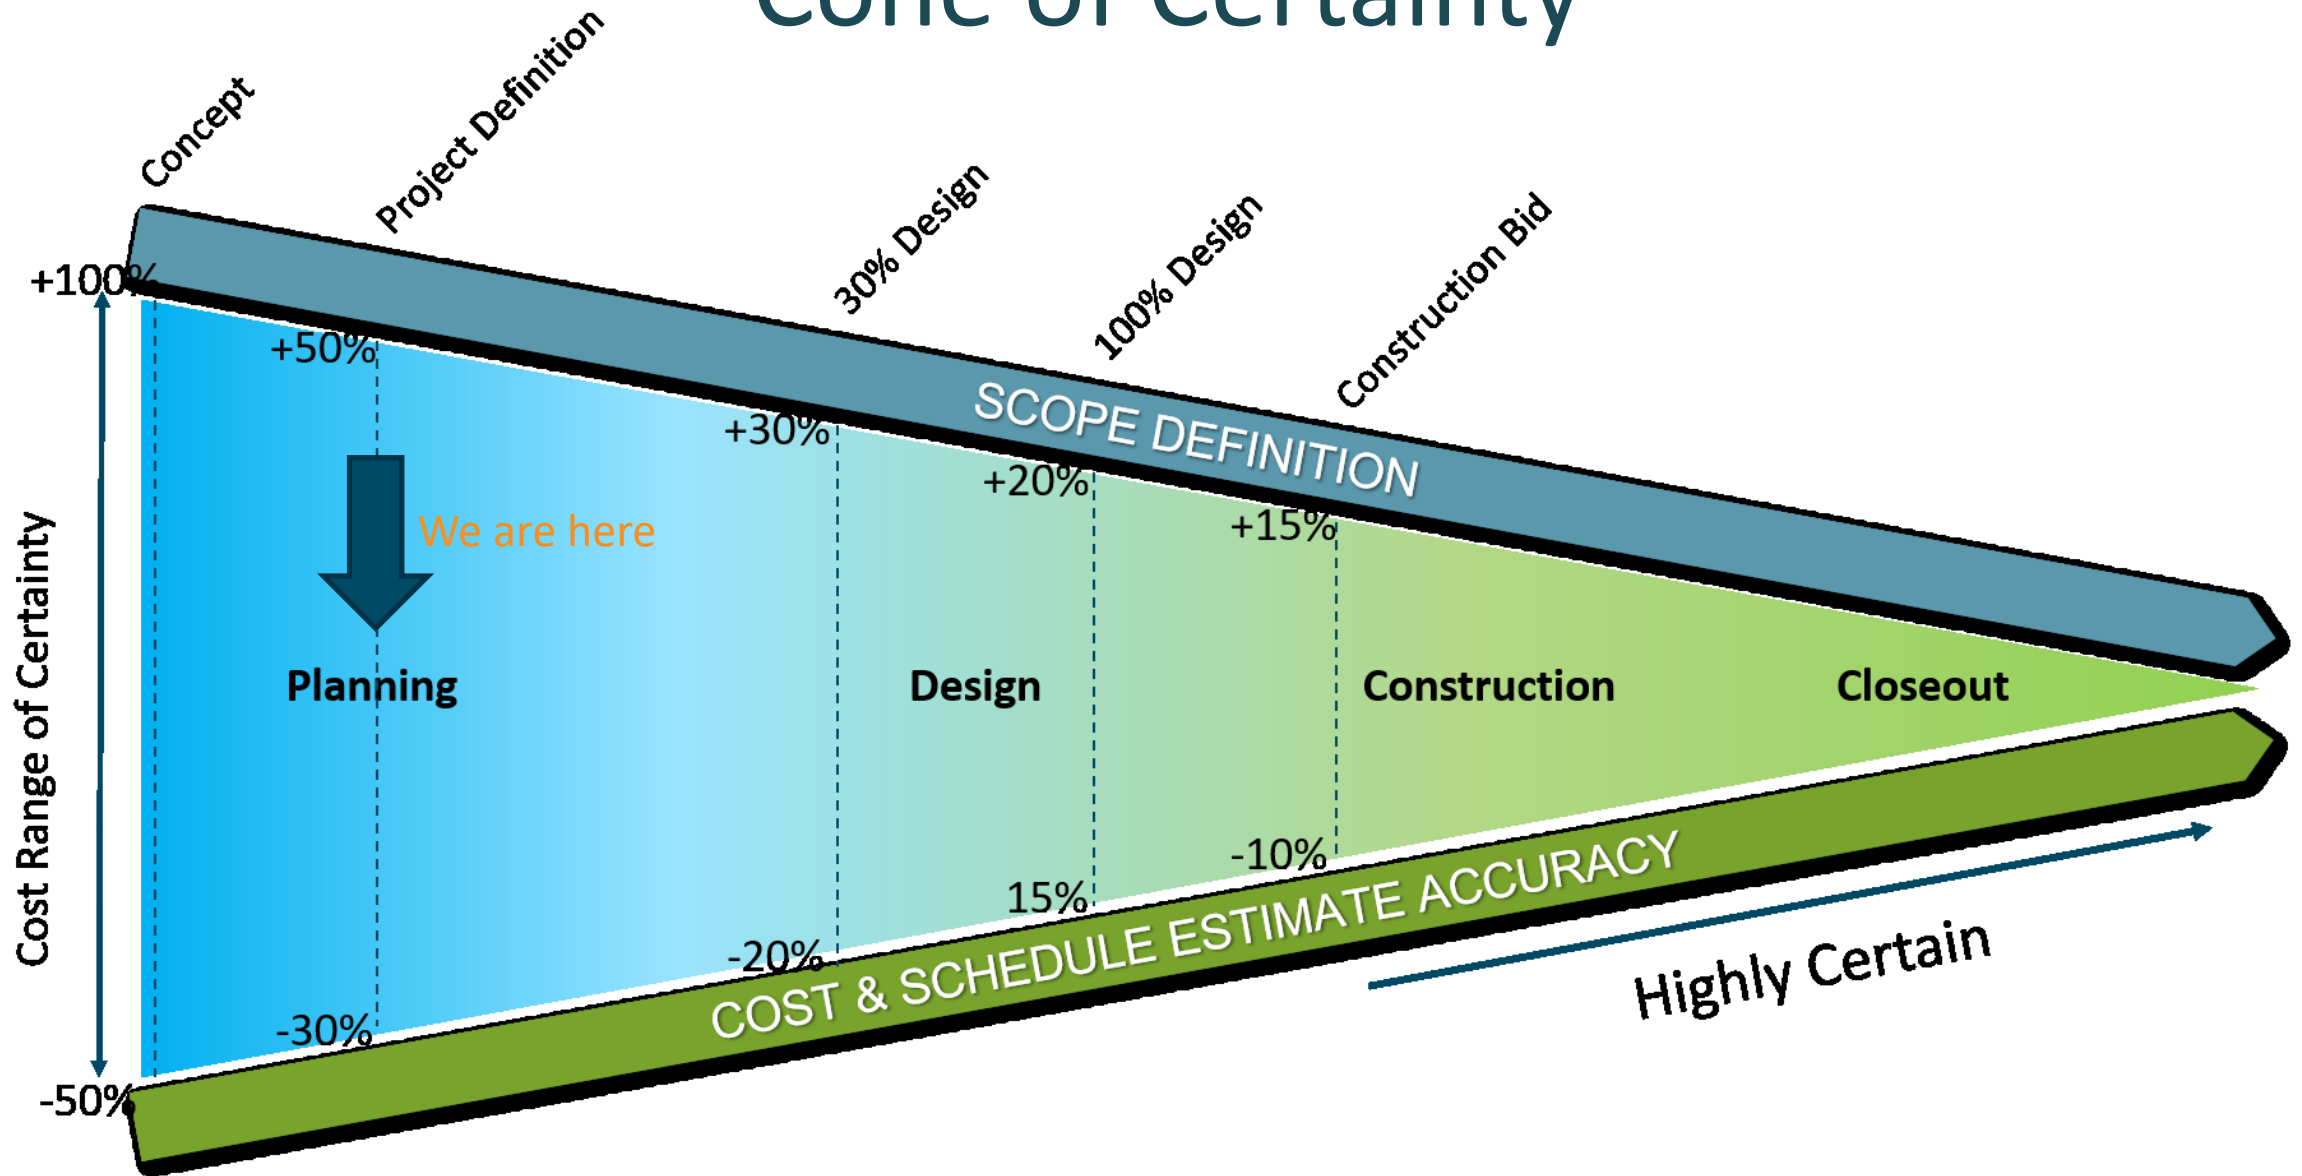

Locations

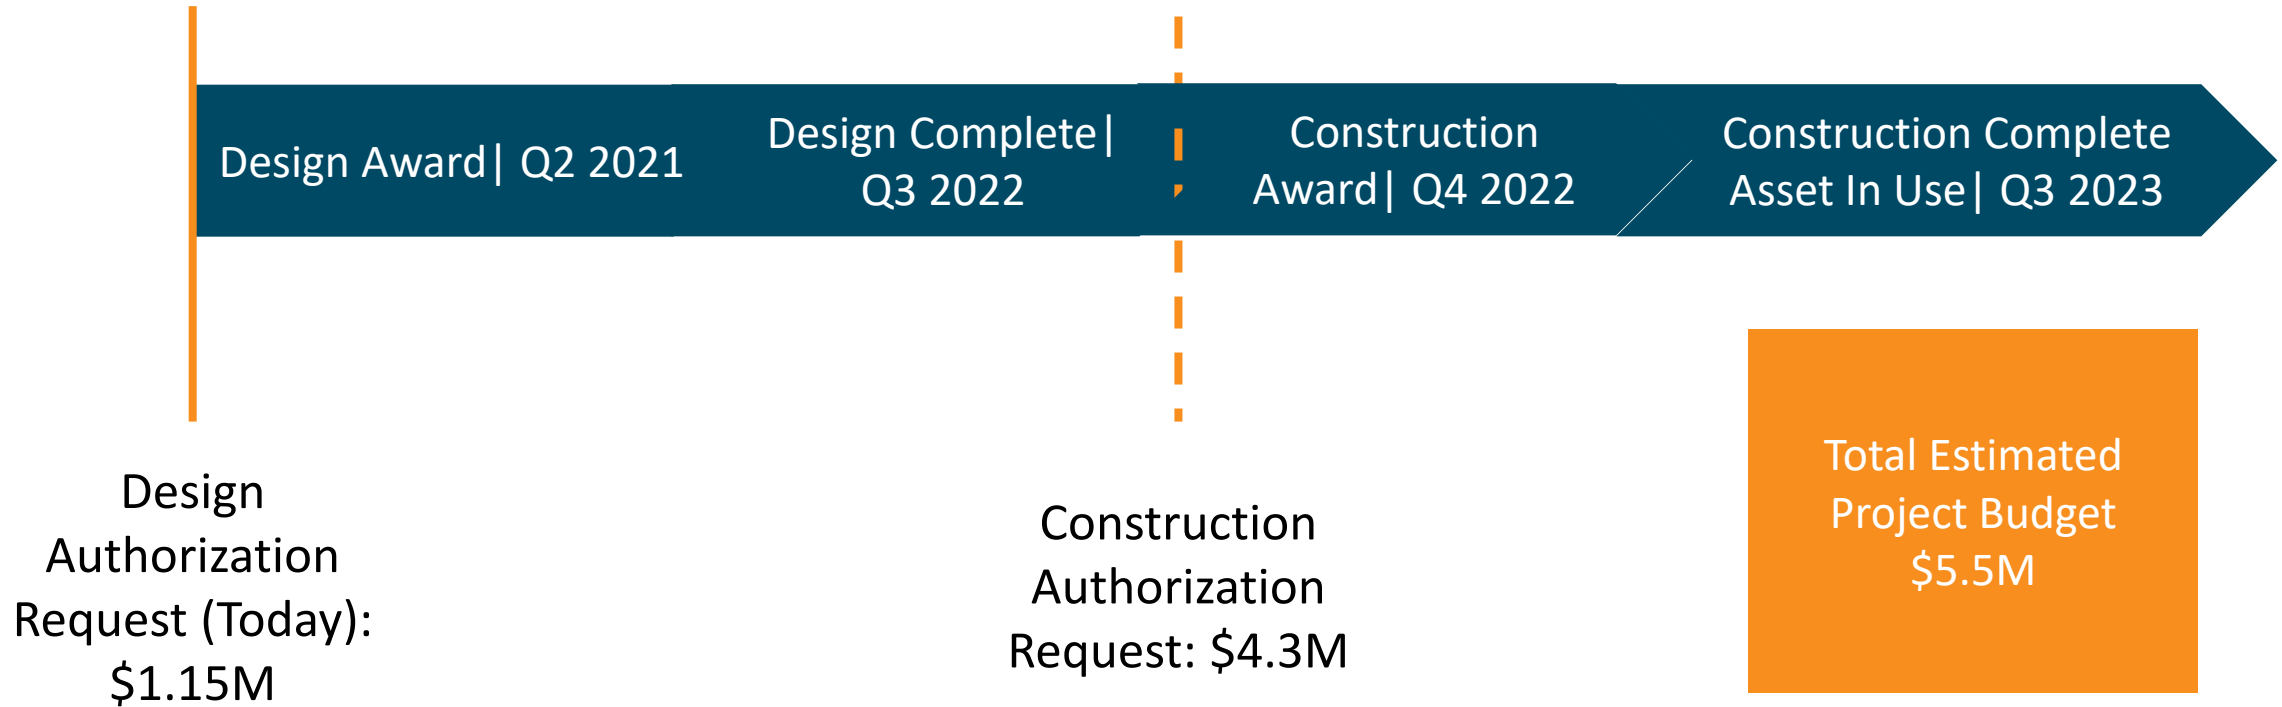

Central Terminal (CT-2) | Formerly Anthony's Fish Bar (Currently Vacant)

Cone of Certainty

Project Schedule and Budget

Project Risks

Risk	Mitigation Plan
Assessment of the conditioned air available for the CT-02 space cannot be fully performed until ongoing construction in the Central Terminal is complete	The project team and stakeholders have identified alternative solutions to provide more conditioned air in the unlikely event that supply to these locations is lacking
When CT-01 Salty's construction is completed, the façade and interior of this project's CT-02 location will be unfinished and public facing.	A barricade will be erected to provide the best passenger experience and maintain the security of the CT-02 space
