Item No. 8d_supp
Meeting Date: June 28, 2022

Load Dock Employee Screening
June 28, 2022
Port Commission Meeting
Seattle-Tacoma International Airport

Project Purpose

- This project is required in order to meet the Airport's goal of full employee screening. This will help ensure safe and secure operations by ensuring prohibited items are not brought into the sterile area.
- Currently, there is access control to the secure side of the terminal on the load dock, but no employee screening.
- Employee screening on the load dock would be collocated with inspections for deliveries in order to provide screening for employees, vendors, contractors, and their personal items.
